

PRODUCT INFO - LIMO + 750 MAINTENANCE AND CLOSE MOWING

- Keep turf thoroughly watered for at least the first 15 days;
- Apply fertilizer rich in phosphorus, potassium and calcium before laying sod;
- **FERTILIZE EVERY 2 WEEKS.**

- 1) After **carefully rolling** or **settling** with a **vibrating plate**, **mow 2 days after installation**, to **¾ inch** twice before mowing shorter;
- 2) After the first two mowings, **gradually begin to mow shorter**, to **11/16 inch** (two mowings);
- 3) **Top dress** (reseed over grass already germinated) generously between shorter mowings;
- 4) A few days later, continue **to shorten** gradually to **5/8 inch** (two mowings);
- 5) A few days later, continue **to shorten** gradually to **9/16 inch** (two mowings);
- 6) **Top dresser** generously between shorter mowings;
- 7) A few days later, continue **to shorten** gradually to **½ inch** (two mowings);
- 8) **Keep** mowing at **½ inch** or desired height. A **top dressing** would be **beneficial** if you want to maintain this height and promote more even mowing.
